ABOUT ME

Full-Stack Developer with a strong frontend focus, building production applications with React, Next.js, TypeScript, and Node.js. Experienced in REST APIs, authentication, PostgreSQL, Docker, and deployment. Developed production Telegram automation tools serving 10K users. Seeking to contribute to a collaborative development team.

FEATURED PROJECTS

Telegram Catalog Bot & Mini App | Github
Node.js • TypeScript • grammY • React • SQLite • Mini App • PM2
Fully automated Telegram bot and React Mini App running in production with PM2, serving 10K users and managing a 10K+ image library. Handles ingestion, daily publishing, and Telegram Stars payments.

Course Progress Tracker | Live Demo | Github
React • TypeScript • Node.js • Express • PostgreSQL • Prisma • Docker
Full-stack course management app with lesson organization and automatic progress tracking. Built an Express REST API with PostgreSQL/Prisma and containerized the full stack with Docker Compose.

Diet Tracker | Live Demo | Github
Next.js • React • TypeScript • Tailwind CSS • NextAuth • PostgreSQL
Full-stack nutrition app for tracking meals, products, and body weight. Implemented authentication, user-isolated data, CRUD flows, PostgreSQL persistence, and USDA API integration.
